

# REBALDÍ ROUTE

The **bosque del Rebaldí** is a dense pine woods located in l'**Alt de Capsades**. This zone is a game preserve. Although the tracks are near the road and housing estates, there is no danger; however we recommend to avoid these routes during the hunting season.

It is a short route but with a major level difference, hence it is important to be in good shape. It is advisable to rely on several bicycle gears for the 2 km ascent of **Camí del Rebaldí**.

## DESCRIPTION:

Once in the upper section of the **Rebaldí**, we enter the tracks up to the woods, one of the most enjoyable sections. Throughout the route, we can discover three points from which we can contemplate spectacular views of **Montgó** or the Bay, where on clear days, we can even see the island of **Ibiza**.

### Departure and Arrival:

Av. Augusta. (IES nº1).

### Distance:

18 km.

### Travel Time:

1hr. 45 min.

### Accumulated Ascent Level

Difference: 97 m.

Difficulty Level: Low.
